## PROFILE

Full-stack software engineer in Helsinki who builds with JavaScript, TypeScript and Java. At Air Dice Oy I build tools for other teams and give them the support they need. My earlier work as a manager taught me to take responsibility and drive projects forward, and as a team player I enjoy collaborating and sharing the work to reach our goals.

## EXPERIENCE

**Full-stack Engineer · Air Dice Oy** Jun 2023 – Present

- Build and maintain internal tools, including the monitoring, tracking and game management tools, and support the teams that use them.
- Develop promotional tools that boost player engagement.
- Prepare, test and deploy new games to QA and testing environments.
- Take part in software architecture design and write clear documentation.

**Full-stack Developer · Integrify** Aug 2022 – Jun 2023

- Built front ends with JavaScript, TypeScript, React and Redux, with a focus on accessibility and animation.
- Built and documented REST APIs with Java, Node.js and Express on SQL and NoSQL databases, unit-tested with Jest.
- Worked with Docker, CI/CD in GitHub Actions and AWS on real-world projects alongside developers of every seniority.

**IT Helpdesk Intern · Oodi Helsinki Central Library** Apr – Jun 2019

- Helped 100+ IT customers a day at a library with 1,000+ daily visitors.
- Maintained devices and IT services, ran the gaming desk, and handled printer maintenance and computer backups.

**Accountant Manager · Iraq Oil** Oct 2011 – Jun 2014

- Managed deposits and accounts for several gas stations and oil storage depots.
- Led a team of 25 station workers, supporting good customer service and an average of €70k in daily sales.

## SELECTED PROJECTS

**Salon Booking Platform** [github.com/Ammam-daham/salon](https://github.com/Ammam-daham/salon)

Booking system for salons and beauty centres, built to run several salons at once, with an admin panel for scheduling and dashboards. In progress.

Java 21 · Spring Boot · PostgreSQL · Next.js · TypeScript · Tailwind CSS

**Blog Post App** [github.com/Ammam-daham/blog-post-client](https://github.com/Ammam-daham/blog-post-client)

Full-stack blogging app with sign-up, posts, likes and comments, on my own REST API with JWT authentication.

React · Redux Toolkit · Node.js · Express · MongoDB

**Currency Exchange API** [github.com/Ammam-daham/currency-exchange-api](https://github.com/Ammam-daham/currency-exchange-api)

REST API that returns exchange rates between currencies from an external rate service.
